

**PRODUCTION OF MICROCAPSULE**

**Patent number:** JP63287544  
**Publication date:** 1988-11-24  
**Inventor:** OWAKI TAKAYUKI; others: 04  
**Applicant:** EISAI CO LTD  
**Classification:**  
**- international:** B01J13/02  
**- european:**  
**Application number:** JP19870120179 19870519  
**Priority number(s):**

**Abstract of JP63287544**

**PURPOSE:** To detoxify capsule and to pulverize oily substance by producing microcapsule by phase separation due to dehydration, using hydroxypropylmethyl cellulose pullulan, etc., as wall material.  
**CONSTITUTION:** A soln. contg. one of hydroxypropylmethylcellulose, hydroxy propylcellulose, and pullulan, as wall material is prepared. Agent for dehydrating such as dextrin, dextran, polyethylene glycol, propylene glycol is added to the soln. contg. wall material to produce microcapsule by separating phase. The agent for dehydrating is advantageously applicable in the field of medicines, etc., because it is innocuous. It can be added as powder, but preferably added as highly concentrated aq. soln.
